

HOW SECURITY ELEVATE WORKS?

Behaviour Elevation

ATTACK SIMULATION

Security Elevate Social Engineering
Campaign

Train End-users to **Identify & Avoid** Social Engineering Attacks

CAMPAIGN IS **SIMPLE & EFFECTIVE!**

Start with providing us your end user's email. Create groups to segment users.

To start the Social Engineering training, an intuitive Phishing campaign will be created and simulated

A Phishing template will be selected. We are also able to use existing Phishing messages circulating online

End users will receive Phishing messages immediately or at a specific scheduled time set

End users are instantly shown an informative training explaining what just happened

Track your results and progress using our advanced and feature-rich reporting
